

Req #: A0003

Position: Physical Security Consultant

Full Time

I²T, LLC is an Engineering Services and Management Consulting organization headquartered in Huntsville AL. We provide a broad range of facility related services, with core knowledge and capability in Asset Protection, Site Security, Energy Optimization, and Project Management.

ESSENTIAL JOB FUNCTIONS, DUTIES AND RESPONSIBILITIES

Independently or under minimal supervision, the candidate will perform variety of Security and Protection tasks in support of multiple projects. Tasks include one or more of the following within the project Life Cycle:

- Able to travel and work overseas for up to 12 months.
- Risk assessment and management programs and associated methodologies to assist in the development of Physical Security risk assessments.
- Computer programs and applications to include Microsoft Excel, Power Point, Access, photo editing tools and the ability to manage data and files on a network environment.
- Experience in the recommendation, planning, integration, and implementation of physical security countermeasures.
- Leverage knowledge of global security systems and technologies to assist facility/site managers in implementing comprehensive critical infrastructure security systems and procedures.
- Ability to communicate effectively, both verbal and written, to organize and present data, reports and financial considerations in a clear, concise and professional manner.
- Ability to interact efficiently and effectively with various personalities in diverse organizational cultures.
- Work independently with minimal supervision.

Duties Include:

- Working with personnel regarding the security design projects and project reviews ensuring project specifications are compatible with existing internal protection technologies.
- Assisting management with the coordination of meeting activities including: taking meeting minutes and action items, and drafting agendas.
- Supporting liaison activities with internal and external stakeholders to identify, resolve, and mitigate programming issues, nuisance alarms, and security system concerns.
- Reviewing and making recommendations on security policies, procedures and standards for physical security systems implementation, maintenance, repair and life cycle management.
- Providing input relating to the National Infrastructure Protection Plan (NIPP), Sector Specific Plan (SSP), and NPPD/FPS policy and directives related to physical security programs.

- Providing technical advice to Facility personnel as a functional subject matter expert (SME) for physical security programs and security countermeasure planning and implementation.
- Advising management officials on physical security related matters and communicates with FPS HQ regarding physical security policies, guidelines and initiatives.
- Assists in countermeasure recommendations to provide the greatest level of operational efficiency in a layered approach to risk mitigation.
- Consult senior level managers, working on plans independently, organize tracking of work and projects, and develop complex security processes and countermeasures that are suitable for implementation.

EDUCATION AND EXPERIENCE

- Extensive knowledge of Physical Security Requirements, Vulnerability and Risk Assessments, Security Technologies, Local, State and Federal policy regulations and installation standards.
- Knowledgeable in physical security policies, directives, guidelines and training methods, impacting civil, military and intelligence agencies in an extensive variety of physical security program areas.
- Experience in developing and maintaining security measures for internal and external stakeholders with an emphasis on work resulting from facility site visits, inspections, and security related working groups.
- Experience as a subject matter expert (SME) in relation to physical security systems, countermeasures, standards, risk methodology and assessment management, and complexities related to physical security systems design, implementation and management.
- Proven performance in providing technical support to organizations on security standards, civil and military, emerging security technologies and industry standards and best practices. Providing detailed input regarding: Access control: Electronic, mechanical and policy related; Alarm systems: Intrusion and duress; Barrier systems: Rated and non-rated applications; Communication systems: Electronic, physical and policy related; Force Protection and Guard Management; Screening systems: X-ray and magnetometer; Surveillance systems: CCTV and lighting and Chemical, Biological and Radiological Risk Mitigation: Risk avoidance and reduction.
- Past experience with the review of security countermeasure recommendations, as well as projects related to new facility construction and/or major renovation.
- Risk assessment and management programs and associated methodologies to assist in the development of Physical Security risk assessments.
- Experience in the recommendation, planning, integration, and implementation of physical security countermeasures. Possess a current working knowledge of global security systems and technologies to assist FPS to recommend the most relevant and current systems to implement a comprehensive critical infrastructure security plan.
- Bachelor's degree or equivalent experience.
- American Society of Industrial Security (ASIS) Certified is preferred.

- Current Security Clearance is Preferred

COMPENSATION

- Compensation based on experience.
- Incentives based on performance.
